

Post-Procedure Instructions

FOR ALL PROCEDURES (Eyebrows, Eyeliner, Lipliner/Full-Lips, Areola, and Camouflage,)

Immediately Following Cosmetic Tattoo Procedure:

Apply ice to the treated area for 10-30 minutes. Ice helps to reduce swelling and aids in healing.

For 14 days following application of permanent cosmetics:

- Apply antibiotic ointment sparingly twice a day for seven days following the procedure, using a clean cotton swab - not your fingertips.
- Do not rub or pick at the epithelial crust; allow it to flake off on its own. There should be absolutely no scrubbing, no cleansing creams, or chemicals. Gently cleanse the intradermal cosmetic area with a mild antibacterial soap. You may rinse with water and lightly pat the area dry. Do not expose treated area to full pressure of the water in the shower.
- Do not soak treated area in bath, swimming pool or hot tub. Do not swim in fresh, salt or chlorinated pool water.
- Do not expose the treated area to the sun.
- Use a total sun block after the procedure area has healed to prevent future fading of pigment color.
- Do not use mascara or eyelash curler for seven days post procedure. When you resume use, purchase a new tube, the old tube may have bacteria in it.
- You cannot give blood for 1 year following your procedure (per the American Red Cross).
- Use sterile bandages and dressings when necessary. (*Areola and Camouflage procedure cannot be guaranteed; these are experimental procedures.*)

I understand that at the first sign of an infection, adverse reaction, or allergic reaction to the procedure, I must notify MK Brows, a health care practitioner, and the Texas Department of Health, Drugs and Medical Devices Division (512) 834-6755.

Failure to follow post-procedure instructions may cause loss of pigment, discoloration, or infection. Remember, colors appear brighter and more sharply defined immediately following the procedure. As the healing progresses, color will soften. A touch-up procedure may or may not be necessary. Final results cannot be determined until healing is complete. Touch-up procedures must be made between 30-60 days following the procedure. Additional fees will apply for touch-ups after 60 days following the procedure. If necessary, an appointment for a touch-up can be made. Please feel free to call if you have any further questions.

Enjoy your permanent cosmetics!
